

KFS Organization Types

Org Type	Definition	Examples
U	University This org type represents the university in a consolidated view. There can only be one <i>U-University</i> org.	Cornell University
P	Campus For an individual chart, <i>P-Campus</i> is the highest org type, and each chart will have only one <i>P</i> type org.	Ithaca Campus, Weill Cornell Medical College Campus
E	Executive This optional org type is used to identify organizations that exist above the College/Division level. There can be multiple orgs assigned with the <i>E</i> type, but they would be used only to roll up multiple College/Division type orgs.	Academic, Administrative, Institutional Activities
C	College/Division The <i>C-College/Division</i> org type is centrally defined and used to indicate major colleges or administrative units.	CALs, A&S, UHRS, DFA
G	Group <i>G-Group</i> is an optional org type used to gather departments into higher-level reporting groups within a College/Division. There can be multiple <i>G</i> type orgs. A Group can report to another org that is either a Group or a College/Division.	CALs - Ithaca Campus; A&S – Social Sciences, Humanities, Programs, etc.
D	Department The <i>D-Department</i> org type identifies the common building blocks of the university. An Org assigned with type <i>D</i> must meet a standard definition: It is generally focused on a particular academic field or administrative function and managed by a chairperson, administrative manager, director, or person in a similar position who has reasonable autonomy over the use of the unit's resources.* A Department can report only to a Group or a College/Division.	Engineering – AEP, CBE, BME; A&S – English, Chemistry and Chemical Biology
S	Section <i>S-Section</i> is an optional org type that identifies organizations below the Department level. There can be multiple orgs with the <i>S</i> type, giving colleges and divisions flexibility in reporting. A Section can report only to another Section or a Department.	Medical College – Hematology under the Department of Medicine; Vet College – Feline Health Center under the Department of Population Medicine and Diagnostic Services

*Note: this is a preliminary definition and subject to change.
